

NORTH PUTNAM STREET MEETING RESCHEDULED

Anticipated Start Date: Beginning May 2023
Anticipated Open to Traffic Date: August 19, 2023
Final Completion Date: October 6, 2023

North Putnam Street, north of the Red Cedar River bridge will be closed for pavement reconstruction, new water mains, new sanitary sewer, storm sewer, curbs, and sidewalks during the summer. The impacted area is from West Riverside, northward through the intersections of East Riverside, Church, and Bismark Streets. The project is expected to take approximately 16 weeks to complete depending on weather conditions. Through traffic on North Putnam Street will be detoured to Grand River Avenue/Zimmer Road/Sherwood Road.

Residents living within the construction zone of North Putnam Street will be accommodated as much as possible but there will be times that alternate parking will be necessary.

Local residents north of the Red Cedar River will need to follow the detour route; however, provisions have been made to allow intermittent traffic from E. Riverside Street to the bridge crossing depending on the construction phasing. Intermittent traffic may also be allowed East/West through the Church St intersection as construction
